

## The Box Fan

making wind  
inside the house  
it clears the air  
from that dead mouse

it blows away  
the fart you made  
and it's a wonderful  
sleeping aid

it dries the paint  
and other vapors  
and silences all  
the noisy neighbors

so if the air  
is stuffy and still  
put one on  
your window sill
